
Product Description

KSEIBI 300A Welding Electrode Holder

From Factory:

- KSEIBI 300-Amp Electrode Holder is used for manual electrode welding to avoid any kind of shock or accident. The large 300-Amp is rated for durability.

Durable Material

High durability spring-loaded jaws approve rods up to 3/16 inch.

Comfortable Design

Specially design for heavy duty works with a comfortable handle.

3 positions Jaw

Well-organized grooved jaw for firm grip of rods in 45°, 90° to 180° positions.

Insulated Handle

Fully insulated handle for both high conductivity and improved cable connections. High quality electrode holder.

How to Use:

- The electrode holder connects to the welding cable and conducts the welding current to the electrode.
- The insulated handle is used to guide the electrode over the weld joint and feed the electrode over the weld joint and feed the electrode into the weld puddle as it is consumed.
- Electrode holders are available in different sizes and are rated on their current carrying capacity.
