

Aluminium Flux Powder KV-508

- Product Dimensions
Quantity: 50 g

Feature

KOVET cast iron brazing flux can be used with with any commercial cast iron torch welding alloy

- It is an iron oxide flux specially prepared to produce better results on problem cast iron
- It has a wide active heat range which eliminates the necessity of several different fluxes

Usage instructions:

- spread evenly over precleaned joint surfaces and also apply to brazing alloy.
- preheat with brazing operation
- remove excess flux with hot water.

Recommend:

- Store in cool and dry place
- Keep in corrosive resistant ventilated system room
- avoid contact with body or clothes. Keep tightly covered when not in use.
- avoid inhaling fumes and ensure sufficient ventilation on the working site
- normal safety precautions apply
