

## HK-600D

- This cutter is used for high pressure container as well as heat-exchanger to be T shape jointed and also for plan hole operating and running stable.
- The height of cutting torch is easy to set, the self-lock system for torch up/down is designed by triangle principle so as to insure the machine tracks the curve precisely.
- Use the infinitude rotating reducing, hose has no intertwist.
- Special designing for reducing body weight and carrying it conveniently.
- Torch fixing with clutch, quick locating can be made by handle.
